Marc leads our Technology and AI practice, helping clients solve business challenges and unlock growth by guiding them through digital transformation and AI adoption, delivering practical solutions and measurable results.

Marc is a senior leader with 25+ years' experience in strategic planning, change management, and digital transformation, managing global PMO and delivery functions for international organisations (such as London Stock Exchange, Travelex and Mastercard). Overseeing large budgets and complex portfolios and driving high performance through sensible governance and effective operating models focused on maximizing customer value across the full change lifecycle.

Key Achievements include:

- Aligning the leadership on shared objectives, measurable KPIs demonstrating the commercial and operational success of the strategy
- Transformed low performing teams, creating value and increasing productivity year on year
- Successful lead and delivered large complex transformations projects

Marc specialises in:

- Leading multi-disciplinary, global teams to deliver high-impact change
- Designing and executing digital transformation and payment strategies
- Embedding flexible frameworks across organisations
- Advising C-suite executives on program delivery in high-stakes environments
- Identifying and managing vendor relationships, budgets and risk in fast-moving sectors

He can help you to:

- Guide organisations through digital transformation and AI adoption to address business challenges and unlock new growth opportunities
- Deliver practical, data-driven solutions that optimise operations and improve efficiency
- Provide strategic planning and hands-on leadership to ensure measurable outcomes and sustainable success
- Mentor teams and foster a collaborative approach to maximise value throughout the change lifecycle
- Implement governance and operating models tailored to each customer's needs.
