Radiology images and reports	87%	6%	6%	1%
Physician and clinical notes	84%	6%	9%	1%
Insurance billing and claims	84%	7%	9%	<0.5%

Demographic information	58%	11%	30%	1%
Social determinants of health	57%	16%	26%	1%

Notes: The bolded rows represent data elements that are not required to be shared under USCDI version 1. The question stated: "Listed below are some of the different types of information in a patient's electronic medical or health records. For each, please select if you personally would or would not want to be able to electronically access, view and download this kind of information from your electronic health records or if you do not care either way."
